to the owners of adjacent property, or in the opinion of the Medical Health Officer the building or its use constitutes a menace to public health.

Subdivisions

6. The approving officer as defined in the "Land Registry Act" shall not approve of a plan of subdivision that does not conform to the requirements of Regulations 7 and 8 hereof without the written consent of the Inspector, except where provision for the relaxation of said regulations is made herein.

7. No land shall be subdivided into lots or parcels for building purposes unless:—

- (b) Each lot in a small-holdings district is at least twenty thousand square feet in area; in a residential district is at least seven thousand five hundred square feet in area and, in addition, is at least sixty feet in width and at least one hundred feet in depth; or in a commercial or industrial district is at least thirty feet in width and at least one hundred feet in depth. Where the area which it is proposed to subdivide is of such a shape, or the design of an adjoining subdivision is such, that in his opinion a variation from such measurements is justified, the approving officer may approve a plan showing such variation:
- (c) Each lot or parcel resulting from the subdivision abuts on a public highway along one full side of said lot:
- (d) The approving officer is satisfied that the subdivision design is suited to the configuration of the land in and about the area which it is proposed to subdivide and to the road plan of adjoining subdivisions:
- (e) In the areas marked "a," "b," and "c" on the plan referred to in section 21, clause (a) hereof the subdivision design conforms with the design marked "Walker Plan" on file in the Inspector's office:

- (g) Road allowances are not less than the width prescribed in Schedule A hereof for the road category in which they are placed by the approving officer; and in the case of an existing road alongside the proposed subdivision, which is of less width than prescribed for its category as aforesaid, the subdivision plan is designed to provide at least half the difference between the existing width and such prescribed width, provided that where the approving officer requires a greater road width than prescribed in said Schedule A the provisions of this section shall apply with respect to such greater width:
- (h) All road allowances are graded and gravelled and all appurtenant works done to the satisfaction of the approving officer:
- (i) All structures of any kind, including fences, are removed from the road allowances:
- (j) The land is not swamp land and is not subject to intermittent or periodic flooding.

(2) Where work, commenced before the date of these regulations, on a building which does not conform to these regulations or which is intended for a non-conforming use, has been discontinued, such work may be resumed within six months of such date. Sufficient progress in the work shall then be made to the satisfaction of the Inspector, otherwise any further construction or use shall be in conformity with these regulations.

Provided, however, that this shall apply to single- and two-family dwellings only and not to living-quarters forming part of a store or similar commercial use or to multiple dwellings. Where two dwellings or more are erected on a parcel of ground exceeding 15,000 square feet in area, they shall be located as if each were on a separate lot conforming to the requirement of these regulations:

- (h) Where privies are permitted, they shall conform to the requirements of section 16 (f) of the Regulations for the Sanitary Control of Industrial Camps;
- (i) No open-joint tiling in a sewage-disposal field and no building, other than accessory buildings which the Medical Health Officer considers not likely to cause pollution of water, shall be erected within a less distance than fifty feet from the normal high-water line of any lake, the waters of which are used for swimming or drinking by human beings; nor from any stream, provided that the prohibition in case of any said stream may be waived at the discretion of the Medical Health Officer;

Where a person obtains a permit, he shall carry out the construction in accordance with the terms on which the permit is based and not otherwise, and in the small-holdings district he shall complete exterior finish according to an approved plan within eighteen months of the issuance of the Building Permit.

17. The Inspector shall have power to enter upon and inspect every building in the course of construction in the area.

2. *Location.*—Any septic or other sewage-disposal tank shall be located outside and be separated from any wall of a dwelling-house. Any disposal-field or area shall be located as far as practicable from any dwelling and in no case shall disposal tiles be nearer at any point than ten feet to any dwelling. Adequate provision shall be made for any condition that may result in a flow of sewage greater than 400 gallons per day in any dwelling or 15 gallons per person per day in any school or similar establishment. When computations or assumptions are made as to the expected flow of sewage, the septic tank shall be sufficiently large to allow a detention period of 24 hours and shall contain in addition a reasonable space for sludge-storage.

The depth of the digestion chamber shall not be less than 42 inches below the level of the liquid outflow. A space of at least 12 inches shall be provided above the level of liquid outflow for scum formation and gas escape.

The inlet and outlet pipes shall be of a size not less than that of the sewer served and shall be so provided with

baffle-plates or with inverted sanitary tee-fittings as to prevent any excess turbulence or disturbance of the scum. The outlet baffle or tee-fitting shall extend not less than 6 inches above and 15 inches below the water-line. The length of open-joint tiling shall be not less than 60 lineal feet per dwelling in porous soils and shall be increased in proportion to the number of bedrooms in excess of two and not more than five at the minimum rate of 18 lineal feet per bedroom.

For schools and similar establishments whose daily requirements are of limited duration the length of open-joint tiling shall be not less than 260 lineal feet.

The volume of the disposal tile and feeder pipes shall in no case be less than 120 per cent of the discharge volume of the dosing chamber.

10. *Tile Disposal-field in Impervious Soil.*—No subsurface sewage irrigation-field shall be constructed in clay or other heavy or impervious soil unless porous filtration media and adequate drainage are provided by removing such impervious soil and replacing it with porous filtering material such as coarse sand, gravel, cinders, or broken stone to a depth below the bottom of the disposal tile of not less than 18 inches and preferably not less than 24 inches.

The tile-trench shall be back-filled with coarse sand, gravel, cinders, or broken stone of particle size not greater than one-half inch in any dimension, to a depth of 6 inches over the top and around the sides of the tile wherever the soil is less porous than coarse sand or gravel. Tiling shall not be laid under any roadway or traffic way.

12. *Grade of Tiling.*—The open-joint tiling shall be laid at a small uniform down grade not exceeding 2 inches per 100 feet.

13. *Lateral Branches of Tiling.*—Lateral branches of open-joint tiling shall be not less than 3 feet apart and shall be connected to the liquid effluent pipe or to a header by sewer-pipe branch fittings. Header pipes shall be of a quality equal to that required for house sewer-pipes.
